#### Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-34 in the reply filed on 6/7/04 is acknowledged.

### Claim Objections

2. Claims 5-9 and 12-13 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claims. See MPEP § 608.01(n). Accordingly, the claims 5-9 and 12-13 not been further treated on the merits.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1-4, 10-11, and 14-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tolles et al (6220942) in view of Cosmano et al (5454750).
  - a. Tolles et al disclose the claimed invention except for a ceramic or carbide ceramic.
  - b. Cosmano et al discloses a polishing system that uses a carbide ceramic or ceramic material which are use to form abrasive pads.
  - c. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the Tolles et al device by providing a material such as a ceramic or carbide ceramic as taught by Cosmano et al which are use to form abrasive pads.

Application/Control Number: 10/018,708

Art Unit: 3723

d. Tolles et al discloses the claimed invention except for a ceramic or carbide ceramic material. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have used a ceramic or carbide ceraminc material, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin, 125 USPQ 416.* 

Page 3

- e. Tolles et al discloses the claimed invention except for grooves with depth range of 1/3 to ½ of thickness. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have grooves with depth range of 1/3 to ½ of thickness, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller, 105 USPQ 233.*
- f. Tolles et al discloses the claimed invention except for a young's modulus of each base being between 1.0 to 5.0kg/cm2 (x10 to the sixth). It would have been obvious to one having ordinary skill in the art at the time the invention was made to have a young's modulus of each base being between 1.0 to 5.0kg/cm2 (x10 to the sixth)., since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller, 105 USPQ 233.*
- g. Tolles et al discloses the claimed invention except for a thermal expansion coefficient of each base being in a range of 1.0x10 (to the sixth)/degrees and 8x10(to the sixth) It would have been obvious to one having ordinary skill in the

art at the time the invention was made to have a thermal expansion coefficient of each base being in a range of 1.0x10 (to the sixth)/degrees and 8x10(to the sixth), since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller, 105 USPQ 233.* 

- h. Tolles et al discloses the claimed invention except for a brazing layer having titanium being a weight of .1 to 10 percent of the weight. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have a brazing layer having titanium being a weight of .1 to 10 percent of the weight since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller, 105 USPQ 233*.
- i. Tolles et al discloses the claimed invention except for an adhesive layer with a thickness of 10 to 50 micrometers. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have an adhesive layer with a thickness of 10 to 50 micrometers, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller, 105 USPQ 233.*

### Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakata et al disclose a device.
